**SESSION 3 (1 HOUR): ORAL ASSESSMENT (25 MARKS)**

Assessor to award marks for each correct response by the candidate in the table below:

Q#	Question	Expected Key response	Max Marks	Awarded
1.	<p>State one application of each of the following types of trunking.</p> <ul style="list-style-type: none"> <li>• PVC trunking.</li> <li>• Metal trunking</li> </ul>	<p>PVC trunking – used in domestic installations.</p> <p>Metal trunking – used in industrial or commercial installations.</p> <p><i>(Award 1 mark for each or zero)</i></p>	2	
2.	Mention two importance of identifying trunking sizes according to IEC standards?	Ensures compatibility with cables, prevents overloading, and complies with international safety and installation standards  <i>(Award 1 mark for each or zero)</i>	2	
3.	Name three trunking accessories	Accessories: Elbows, couplers, end caps.  <i>(Award 1 mark for each or zero)</i>	3	
4.	State one safety precaution to observe when preparing trunking work pieces.	Wear appropriate PPE such as gloves and safety goggles to avoid injury.  <i>(Award 1 mark or zero)</i>	1	
5.	<p>Name the tool used for:</p> <ul style="list-style-type: none"> <li>• Measuring trunking</li> <li>• cutting trunking</li> </ul>	<p>Measuring tape – for accurate dimensions.</p> <p>Hacksaw – for cutting trunking cleanly.</p> <p><i>(Award 1 mark for each or zero)</i></p>	2	
6.	Why is it important to observe safety measures when mounting trunking?	To avoid injuries, ensure safe use of tools, and prevent accidents during the installation process.  <i>(Award 1 mark for any or zero)</i>	1	

7.	State two housekeeping activities to be performed after mounting trunking.	Clean the work area, collect and dispose of waste materials properly, store tools and equipment safely <i>(Award 1 mark for each or zero)</i>	2	
8.	Mention three importance of cable colour coding.	Prevents incorrect connections Ensures safety Simplifies maintenance and troubleshooting. <i>(Award 1 mark for each or zero)</i>	3	
9.	State three factors to consider when selecting proper cable size for installation in a trunking system.	Based on the current load, length of cable run, and voltage drop considerations as per IEC standards. <i>(Award 1 mark for each or zero)</i>	3	
10.	Explain the importance visual inspection in trunking installation.	Checking for physical defects, loose fittings, or damage to ensure quality and safety before energizing the system. <i>(Award 2 mark or zero)</i>	2	
11.	Describe the procedure of performing a continuity test in a trunking system.	Use a multimeter to check if electrical current can flow through the cable from end to end. A continuous tone or reading indicates a good connection. <i>(Award 1 mark for each or zero)</i>	2	
12.	Mention two risks of incorrect polarity	A test to ensure live and neutral wires are correctly connected. Incorrect polarity can cause electric shock; cause equipment damage.	2
